SAN JOAQUIN COUNTY – Caltrans is preparing to begin a bridge preventative maintenance and rehabilitation project that will make necessary upgrades and repairs of the Old River Bridge on State Route 4 (SR-4), located at the San Joaquin/Contra Costa County line, east of Discovery Bay.

This project is required to upgrade existing mechanical and electrical components and to implement structural repairs in order to increase the reliability and serviceability of this 100-year-old swing span bridge.

Work will include repairing or replacing equipment that operates the movable portion of the bridge, replacing the electrical power supply to the bridge by installing a new cable on the river bottom, and adding a new control board and associated equipment to the control house above the traveled way of SR-4 on the bridge structure.

This \$10.7 million SB 1 project will be performed by California Engineering Contractors, Inc. (Pleasanton, CA) and is scheduled to begin the week of September 19-23, 2022, with completion expected in May 2023 (weather permitting.)
